с заполните временную таблицу данными из dbo.Person. Поля SalesYTD и SalesLastYear заполните значениями из таблицы Sales.SalesPerson. Посчитайте количество заказов, оформленных каждым продавцом (SalesPersonID) в таблице Sales.SalesOrderHeader и заполните этими значениями поле OrdersNum. Подсчет количества заказов осуществите в Common Table Expression (CTE).

```
JWITH [OrdersNum_CTE] AS (
     SELECT
         [SalesPersonID]
                                  AS [BusinessEntityID],

      напишите Merge выражение, использующее dbo. Person как target, a
e
      временную таблицу как source. Для связи target и source используйте
      BusinessEntityID. Обновите поля SalesYTD, SalesLastYear и OrdersNum
      таблицы dbo.Person, если запись присутствует и в source и в target. Если
      строка присутствует во временной таблице, но не существует в target,
      добавьте строку в dbo.Person. Если в dbo.Person присутствует такая строка,
      которой не существует во временной таблице, удалите строку из
      dbo.Person.
```

```
MERGE INTO [dbo].[Person] AS [target_t]
 USING #Person AS [source_t] ON [target_t].[BusinessEntityID] = [source_t].[BusinessEntityID]
 WHEN MATCHED THEN
     UPDATE SET
        [target_t].[SalesYTD]
                                = [source t].[SalesYTD],
        [target_t].[SalesLastYear] = [source t].[SalesLastYear],
        [target_t].[OrdersNum]
                                = [source_t].[OrdersNum]
 WHEN NOT MATCHED BY TARGET THEN
     INSERT (
        [BusinessEntityID],
